.... PREFACE

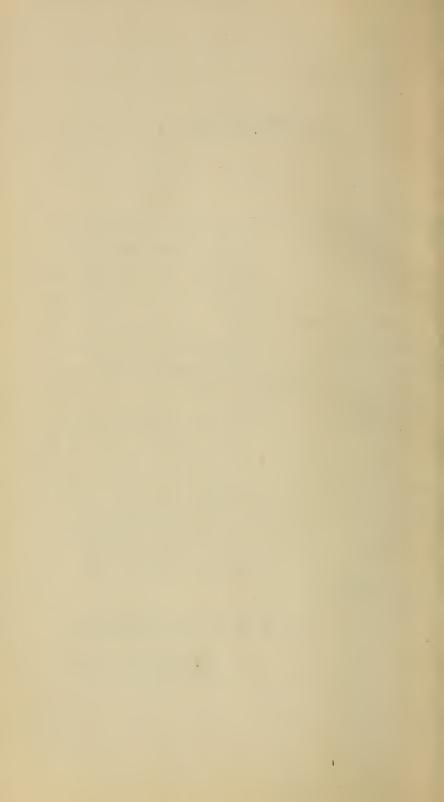

پي

HE object of putting this book, "BAHRENBURG'S COMPLETE CALCULATOR," before the public is to provide a complete reckoner for the Ice and Coal trade by which not only time and labor will be saved, but all possibilities of errors in figuring, either by buyer or seller, will be avoided, as this book has been computed with great accuracy, and the correctness of same can be relied upon.

This table was composed on the basis that whereever occurs the fraction of ½ cent or over, it is taken and considered one cent, as is customary in all trades, and in case of less than ½ cent the fraction is dropped and not figured. By examining this book you cannot help seeing its value and usefulness. This "Book" will be forwarded postpaid to any address on receipt of \$1.00.
